

The Index September 2014

21 April 2015

The premiere publication of the PGP Index illustrates the progress achieved since the housing market began its steady recovery in early-2009.

“The result of many months of research and development, the Pam Golding Residential Property Index and the analysis around this is notable as the first comprehensive appraisal of the residential property market and its many complexities, spanning the various regions around the country.”

Dr. Andrew Golding, Chief Executive, The Pam Golding Property Group

The Index is unique as it portrays an accurate, holistic snapshot of property pricing trends in the South African residential real estate market, rather than a confined view based purely on average sales data according to very specific market segments.
